

JAMIE C. WARREN

Instructional Designer & Interactive Learning Developer

Brevard, NC (Remote) | mopajazz@gmail.com | [LinkedIn](#) | jamiewarren.dev

SUMMARY

Instructional designer and developer with 4+ years building interactive, accessible learning experiences in higher education, backed by 15+ years across teaching and IT. Hands-on with Articulate Storyline 360 and Rise 360, H5P, and custom HTML/CSS/JavaScript interactives delivered as SCORM to Canvas — including SCORM API-level debugging and troubleshooting. Core builder on a college-wide Moodle-to-Canvas migration. University of Tennessee, Knoxville alumnus (M.M. 2006).

CORE COMPETENCIES

- Interactive development: Articulate Storyline 360 & Rise 360, H5P, custom HTML/CSS/JavaScript interactives, scenario-based and drag-and-drop learning
- SCORM & LMS: SCORM packaging, testing, and API-level troubleshooting; Canvas LMS administration and course setup; Moodle; LTI integrations; QTI assessment conversion
- Accessibility: WCAG 2.1 auditing, semantic HTML, screen-reader testing, captioning, Universal Design for Learning
- Design & pre-production: Backward design and ADDIE, storyboards and flowcharts, Figma/FigJam course mapping, visual design and typography
- Media production: Studio video production, Adobe Creative Cloud (Premiere Pro, Photoshop, Illustrator, After Effects, Audition), OBS, lightboard, 360° video
- Collaboration: SME and faculty partnership, design reviews, QA cycles, project documentation and status tracking

PROFESSIONAL EXPERIENCE

Instructional Designer | Blue Ridge Community College Mar 2022 – Present

- Design and develop interactive learning objects in Storyline, Rise, H5P, and custom HTML/JavaScript — branching scenarios, drag-and-drops, interactive study tools, and knowledge checks — published as SCORM to the LMS.
- Serve as a core builder in the college-wide, state-mandated Moodle-to-Canvas migration — designing the course-rebuild pipeline and rebuilding courses end to end with Canvas Pages, Quizzes, H5P, and SCORM content for an August 2026 launch.
- Troubleshoot SCORM at the API level: resolved embedded-video failures (YouTube Error 153) with origin-fallback logic, debugged SCORM 1.2 runtime calls, and built a Moodle XML-to-QTI converter to carry assessments into Canvas.
- Built a reusable, WCAG-compliant HTML component library for Canvas course rebuilds, documented in a shared knowledge base with a live preview workflow.
- Partner with faculty and SMEs to define measurable objectives and translate content into engaging online experiences; run design reviews, QA checks, and revision cycles.
- Audit courses against WCAG 2.1: semantic HTML, alt text, color contrast, captioned video, and screen-reader-tested interactions.
- Modernized the authoring workflow with Storyline/Rise templates, Figma course maps, H5P, and reusable video templates.
- Lead faculty development workshops on Storyline, Rise, H5P, accessibility, UX for educators, and AI-assisted teaching; manage an on-campus studio producing instructional video.

IT Specialist | Blue Ridge Community College Mar 2021 – May 2022

- Provided front-line IT support for faculty, staff, and students at a satellite campus, including Active Directory account and password management.
- Imaged, updated, and maintained a fleet of ~90 devices (50+ laptops, 40+ desktops) using Deep Freeze.

- Upgraded every classroom on campus from projector setups to SMART Boards — installed and configured 15 SMART Board systems paired with Yamaha soundbars.
- Supported distance learning delivery for Continuing Education and Adult Education programs, troubleshooting network conflicts with Pearson's remote-proctoring protocols.
- Administered the campus Emergency Response System.
- Served as photographer for the college's marketing team; community outreach photos published in local newspapers.

Systems & Desktop Administrator | Brevard College Mar 2017 – Mar 2021

- Served as root Canvas LMS administrator during an emergency migration — configured course shells, SSO, and integrations while running daily faculty support sessions.
- Managed the full lifecycle of classroom and employee desktops, laptops, and assigned hardware — deployment, maintenance, troubleshooting, and retirement — for students, staff, and faculty.
- Administered Adobe Creative Cloud campus-wide: license management plus hands-on user support and training across the full suite.
- Administered print services, security camera systems, license servers, and digital signage.
- Redesigned classrooms for hybrid instruction and trained faculty on simultaneous in-person/remote teaching.

Adjunct Faculty, Jazz Studies | Brevard College · Lincoln Memorial University 2009 – 2017

- Designed curriculum, directed ensembles, and built measurable skill progressions in improvisation and ear training — the sequencing instincts that still drive my instructional design.

SELECTED INTERACTIVE PROJECTS

- Jazz Interactive — free OER with browser-based interactive exercises built on a See/Hear/Play/Apply loop; custom JavaScript audio engine, dark mode, mobile-responsive. jazzinteractive.org
- Wall & Partition Assembly — Storyline 360 drag-and-drop with immediate feedback for a CTE construction course. [View project](#)
- UX for Educators — Rise 360 faculty PD series on learner-centered design. [View course](#)
- Interactive study tools — standalone HTML/JavaScript study companions paired with SCORM lessons for design and ecology courses; deployable to any LMS or the web.
- Moodle XML → QTI Converter — custom tool converting legacy quiz banks (multiple choice, matching, short answer) into Canvas-compliant QTI packages.

EDUCATION & CERTIFICATIONS

- Master of Music — University of Tennessee, Knoxville, 2006
- K-12 Tennessee Teaching License — University of Tennessee, 2009
- Bachelor of Arts — Brevard College, 2002
- Design Thinking Practitioner (IBM) · Interaction Design Foundation (IxDF) · CompTIA A+
